General Construction Fire Safety Permit Instructions

- This permit application is intended to be used for general fire safety construction permits. If you are applying for a Sprinkler, standpipe, fire pump, hood suppression, or a tent/temporary membrane structure, DO NOT USE THIS APPLICATION.
- Multiple permits types may be requested on a single form. Additional documentation may be required based on the permit type(s) you are requesting. When “Plan review” is indicated in the below table, submit all relevant plans/blueprints with this application.
- **Completed permit applications may be sent by fax or mail for review.** No permits will be issued before the permit fees are paid (or a portion thereof for hourly permits).
- Should you have any questions as to what permits you may need, or the fees and documentation required to obtain them, please see the “Construction Permits in Detail” document. If you still have questions, please contact the fire marshal’s office.
